ABOUT ME

Bilingual Business Analytics student at the University of Central Florida with a strong foundation in project coordination: managing scope, schedules, milestones, budgets, and deliverables, and serving as the central point of communication between operations, engineering, and leadership teams. Pairs organizational discipline with data-driven analysis (Excel, Power BI, SQL) to keep cross-functional work aligned. Detail-oriented, adaptable, and motivated by continuous improvement.

SKILLS

Project Scheduling & Coordination: Schedule and milestone tracking (Smartsheet), cross-functional schedule integration, deliverables tracking, coordinating internal/external stakeholders and contractors.

Data Analysis & Visualization: Power BI, Tableau, Excel, SQL, Python, KPI and performance tracking, trend analysis, forecasting, dashboard development.

Presentation & Graphic Design: PowerPoint & Keynote presentation development, Adobe Photoshop & Illustrator, progress reporting and management presentations.

Programming & Database: SQL queries and data pipeline development, Python and programming for analytics applications.

Software & Systems: Microsoft Office Suite (Excel, Word, PowerPoint, Outlook, Teams), Smartsheet and SketchUp.

Certifications: CAPM (Certified Associate in Project Management), Microsoft Office Specialist: Excel Associate; Disney Data and Analytics Business Intelligence Certifications.

EDUCATION

University Of Central Florida 2024-2026

BSBA in Business Analytics

- Expected graduation Fall 2026

Valencia College 2022-2023

Associate's in Arts Degree

- Business Specialist Certificate

WORK EXPIRIENCE

Walt Disney World Costuming | Disney Live Entertainment |Project Analyst Professional Intern 2025 - Present

- Track project deliverables and milestones, communicate timelines and status updates to stakeholders, and manage multiple concurrent assignments with attention to detail in a fast paced environment.
- Collaborate with stakeholders across teams to identify process pain points, gather requirements, and translate business needs into structured solutions, keeping partners informed as work moves from request to delivery.
- Calculated and analyzed garment longevity trends across a large costuming inventory dataset, translating findings into insights that informed replacement planning and budget forecasting.
- Create and refine documentation for digital tools to support consistent onboarding and user adoption across Cast Members at various organizational levels.
- Maintain and enhance existing Tableau and Power BI dashboards by performing updates, validating logic, and improving usability to ensure ongoing operational value and accurate reporting.

Disney's Worldwide Safety Assurance Internal Assignment | Video Analysis 2024-2025

- Analyzed large datasets from attraction operations footage to evaluate guest behavior patterns and ensure adherence to safety protocols and performance standards.
- Structured and validated AI-generated observational data for trend analysis, enabling efficient, insight-driven reporting to key stakeholders.
- Created clear visual reports and dashboards in Excel to communicate complex findings and support leadership in data-driven decision-making.
- Collaborated with the Safety Assurance team to uncover operational risks through systematic data analysis and inform strategic improvements to guest safety procedures.
- Balanced multiple analytical priorities while maintaining tight deadlines in a fast-paced operational environment.

Walt Disney World | Tomorrowland Attractions & Disney Skyliner Transportation | Coordinator 2023-2025

- Planned and coordinated end-to-end operational workflows across Tomorrowland attractions and Disney Skyliner, integrating with resorts, park operations, guest relations, and engineering to deliver seamless guest experiences.
- Supervised approximately 100 Cast Members, managing scheduling, labor budgets, and performance accountability while giving and taking direction across a large, cross-functional team.
- Analyzed guest flow trends and key throughput metrics using data-driven scheduling to proactively resolve bottlenecks and sustain operational targets.
- Led safety audits and compliance checks, leveraging performance data to implement corrective actions.
- Designed, developed, and deployed a custom ordering expense tracking application using coding and database skills, streamlining supply management workflows and improving data integrity for budget tracking across operations.
